

## Where will my website be hosted?

We purchase web space on a large server complete with daily backup, redundancy, 24/7 monitoring and tech-support, anti-virus and anti-spam, as well as a host of valuable services and security measures. We monitor our host regularly to ensure that you receive only the best of service. If we locate a better choice in hosts, we will contact you and offer to switch. After evaluating the options, we believe outsourcing our servers provides you with the highest value and security.
