

EnVision Manistee County

Envision Manistee County's website utilizes the latest in content management technology allowing our client to update their own website at will.

Envision wanted a site that would be easy for the novice surfer to navigate and yet enjoyed by experienced viewers. We designed a custom template and logo to meet this need.

Since the purpose of this visioning initiative is communication, we implemented a polling module allowing visitors to vote on important issues and a discussion board where users could talk about various aspects pertaining to the initiative.

Other modules installed with this site include: coming events and a calendar, site search, latest news, web links and a contact form.
